Push the window switch down firmly to the second detent to open the window completely and continue to hold the switch down for an additional two seconds after the window is fully open. Sliding Side Door Power Window Switch — If Equipped Second row passengers may open and close the sliding door window by a single switch on the door handle assembly. The switches will operate only when the ignition switch is in the ON/RUN or ACC position and during power accessory delay. NOTE:The switches will not operate if the driver has activated the Power Window Lockout. NOTE:The sliding door windows do not fully open, stopping several inches above the window sill. Sliding Door Power Window Switch 2 THINGS TO KNOW BEFORE STARTING YOUR VEHICLE 49 Page 52 of 726Wind Buffeting Wind buffeting can be described as the perception of pressure on the ears or a helicopter-type sound in the ears. Your vehicle may exhibit wind buffeting with the windows down, or the sunroof (if equipped) in certain open or partially open positions. This is a normal occurrence and can be minimized. If the rear windows are open and buffeting occurs, open the front and rear windows together to minimize the buffeting. If the buffeting occurs with the sunroof open, adjust the sunroof opening to minimize the buffeting. SLIDING SIDE DOOR The sliding door may be opened from the inside or the outside. Pull outward on the exterior handle to open the sliding door. The sliding door inside handle functions by rocking forward and back. Rocking the handle backwards opens the door and rocking forward releases the hold open latch in order to close the door. To keep your door operating properly, observe the following guidelines: •Always open the door smoothly. •Avoid high impacts against the door stop when opening the door. This is very important when your vehicle is parked on an incline as the door will slide faster in the downhill direction. •There is a hold-open latch that is activated when the sliding door is fully opened. This latch will keep your sliding door open on any incline. To close the sliding door after the hold-open latch is activated, you must rock the inside handle forward or pull outward on the exterior handle. Always make sure that the sliding door is fully latched anytime the vehicle is in motion. 50 THINGS TO KNOW BEFORE STARTING YOUR VEHICLE Page 53 of 726NOTE:The left side sliding door cannot be opened while the fuel door is open. This feature operates only when the sliding door is fully closed prior to opening the fuel door. Power Sliding Side Door — If Equipped The power sliding door may be opened or closed manually or by using the buttons on the RKE transmitter, overhead console switch, or rear door switch. Pulling the inside or outside power sliding door handle will also power open or close the power sliding door. NOTE:Pulling the outside power sliding door handle a second time while the sliding door is power opening or power closing will allow the sliding door to be opened or closed manually. Push the button on the RKE transmitter twice within five seconds to open a power sliding door. When the door is fully open, pushing the button twice within five seconds a second time will close the door. There are power sliding side door switches located on the B-pillar trim panel, just in front of the power sliding door for the rear seat passengers and in the overhead console for the driver and passengers. Pushing the switch once will open the power sliding door. If the switch is pushed while the door is under a power cycle, the door will reverse direction. NOTE:The power sliding side door must be unlocked before the power sliding door switches will operate. 2 THINGS TO KNOW BEFORE STARTING YOUR VEHICLE 51 Page 54 of 726If the inside or outside door handles are used while the power sliding side door is activated, the power sliding door feature will be canceled and will go into manual mode. To avoid unintentional operation of the power sliding doors from the rear seats, push the power sliding door master lock button, located in the overhead console, to disable the switches and handles for the rear seat passengers. NOTE. •The power sliding side door switches will not open the power sliding door if the shift lever is in gear or the vehicle speed is above 0 mph (0 km/h). To close the power sliding door with the shift lever in gear and vehicle speed at 0 mph (0 km/h), the brake must be pushed. •If anything obstructs the power sliding side door while it is closing or opening, the door will automatically reverse to the closed or open position, provided it meets sufficient resistance. Power Sliding Door Switch 52 THINGS TO KNOW BEFORE STARTING YOUR VEHICLE Page 55 of 726•If the power sliding side door is not in the full open or close position, it will fully open when a power sliding door switch is pushed. To close the door, wait until it is fully open and then push the switch again. •If the power sliding door encounters multiple obstructions within the same cycle, the system will automatically stop, the power sliding door motor will make a clicking sound until the door has no further movement. This clicking sound can be stopped by pulling the inside or outside handle. If this condition occurs, no damage is done to the power sliding door motor. The power sliding door must be opened or closed manually. WARNING! You, or others, could be injured if caught in the path of the sliding door. Make sure the door path is clear before closing the door. Power Sliding Side Door Open Flash The left and right exterior hazard lights will flash for 12 seconds when either sliding door is opened. This will alert other drivers in the area that passenger(s) could be entering or exiting the vehicle. The Sliding Side Door Open Flash can be enabled or disabled by performing the following procedure: 1. Place the Key Fob in the ignition switch. 2. Cycle the ignition switch from ON/RUN to OFF five times ending in the ON/RUN position(do not start the engine). 3. Within 10 seconds of the final cycle, push the HAZARD switch ON. 4. A single chime will sound to signify that you have successfully completed the programming. 2 THINGS TO KNOW BEFORE STARTING YOUR VEHICLE 53 Page 56 of 726You can turn the feature back on by repeating the previous procedure. Power Sliding Side Door Power Switch To provide a safer environment for small children riding in the rear seats, the second row sliding door switches and handles may be overridden by pushing the OFF side of the Power Switch located in the front overhead console. When the power sliding door power switch is in the OFF position, the power sliding side door may not be opened or closed by pushing the switch located on the B-pillar trim panel, just in front of the sliding door or activating the inside power sliding door handle. Overhead Console Power Sliding Door Power Switch 1—LeftSlidingDoor3—RightSlidingDoor2 — Liftgate4 — Power Switch 54 THINGS TO KNOW BEFORE STARTING YOUR VEHICLE Page 57 of 726Sliding Side Door Child Protection Lock To provide a safer environment for small children riding in the rear seats, the sliding doors are equipped with a Child Protection Door Lock system. NOTE:When the Child Protection Door Lock system is engaged, the door can be opened only by using the outside door handle even though the inside door lock is in the unlocked position. To engage The Child Protection Door Lock 1. Open the sliding side door. 2. Slide the Child Protection Door Lock control inward (toward the vehicle) to engage the Child Protection Door Lock. 3. Repeat Steps 1 and 2 on the opposite sliding door. Child Protection Door Lock 2 THINGS TO KNOW BEFORE STARTING YOUR VEHICLE 55 Page 58 of 726NOTE: •After engaging the Child Protection Door Lock, always test the door from the inside to make certain it is in the desired position. •When the Child Protection Door Lock system is engaged, (even if the inside door lock is in the unlocked position) the door can be opened only by using the outside door handle, the RKE transmitter, the switches on the overhead console or the switches located on the trim panel just in front of the power sliding door. •The power sliding side door will operate from the switches located on the B-pillar trim panel, just in front of the power sliding door, regardless of the Child Protection Door Lock lever position.To avoid unintentional operation of the power sliding door from the rear seats, push the "OFF" Master Lock Out Switch located in the front overhead console, next to the driver. WARNING! Avoid trapping anyone in the vehicle in a collision. Remember that the sliding doors can only be opened from the outside door handle or the switches located on the B-Pillar trim panel just in front of the power sliding door when the Child Protection Door Locks are engaged. 56 THINGS TO KNOW BEFORE STARTING YOUR VEHICLE Page 59 of 726To disengage The Child Protection Door Lock 1. Open the sliding side door. 2. Slide the Child Protection Door Lock control outward (away from the vehicle) to disengage the Child Protection Door Lock. 3. Repeat Steps 1 and 2 on the opposite sliding door (if equipped). NOTE: •After setting the Child Protection Door Lock system, always test the door from the inside to make certain it is in the desired position. •The power sliding side door switches will not open the power sliding doors if the vehicle is in gear or the vehicle speed is above 0 mph (0 km/h). •The power sliding door will operate from the outside door handle, the RKE transmitter, the switches on the overhead console, or the switches located on the B-pillar trim panel, just in front of the power sliding door when the shift lever is in PARK, regardless of the child lock lever position. 2 THINGS TO KNOW BEFORE STARTING YOUR VEHICLE 57 Page 60 of 726LIFTGATE On vehicles equipped with power locks, the liftgate can be unlocked using the Remote Keyless Entry (RKE) transmitter button, or by activating the power door lock switches located on the front doors. To open the liftgate, push the liftgate release handle located on the underside of the license plate bar and pull the liftgate open with one fluid motion. Liftgate Handle Location 58 THINGS TO KNOW BEFORE STARTING YOUR VEHICLE Trending: coolant temperature, Brake, Torque specifications, front motor blower, Display, automatic transmission, Radio
